

SERFF v7.0 Known Issues updated 12/29/2014

ID	Short Description	Detail	Workaround	Status
7555	Binder Export displays duplicate data when EFT submitted multiple days within a single Binder.	The Binder Export duplicates plan data when EFT has been submitted on subsequent days after initial submission.	Identify duplicate rows. To do so, complete the following: <ul style="list-style-type: none"> ▪ Select the Column T – Standard Component ID. ▪ On the Home tab, choose Conditional Formatting > Highlight Cells Rules > Duplicate Values. ▪ Click OK. ▪ Duplicate values within the column will now be identified. 	Outstanding
20813	Searches cannot be saved if criteria exceeds database limitations.	If a state or industry user attempts to save a search with a very large criteria set, they may receive an error message. This is most likely to occur on a saved search with numerous authors or reviewers selected	Create multiple searches with smaller criteria sets.	Outstanding
55456	Filer Notes on paper filings cannot be edited or deleted.	Filer notes created on paper filings at the data hosting site cannot be edited or deleted after being saved.	N/A	Outstanding
72559	Invalid signature on PDF attachment after using Pipeline.	A PDF signature becomes invalid when the file goes through Pipeline. Pipeline compiles the filing to into one PDF. Because of this, the PDF signature sequence changes, which invalidates the signature.	Adobe's implementation of signatures ensures that the signature is valid as long as the attachment is unchanged. Considering this is a native security feature of PDF files, there is no way to prevent this from happening when using Pipeline.	Outstanding
95955	Only the first page/cover sheet of packaged or bound PDFs appears in the PDF Pipeline.	If a packaged or bound PDF (PDF including multiple PDF files) is attached, only the cover sheet or the first page appears in the PDF Pipeline.	1. PDF Files can be attached separately (instead of via one bound PDF). 2. Pipeline can be generated and bound document can be downloaded and manually inserted into the Pipeline by the user.	Outstanding
