SERFF 7.11 Release Notes

SERFF 7.11 was released to production on Thursday, February 2, 2017.

The 7.11 release includes improvements to the federal plan transfer process that will not be noticeable in the application. It is anticipated that they will positively impact performance in the transfer process which means that users will hopefully see faster responses to their federal transfers. These changes will not impact state based exchanges that use the transfer functionality.

Minor changes were also made in preparation for being able to accept the Plan Year 2018 federal templates.

The release also includes a Java 8 upgrade and minor bug fixes.
