

SERFF 7.6 Release Notes

SERFF 7.6 was released to production on Thursday, December 17, 2015. The 7.6 release contains the Filing Workflow Report and other small changes

New Features in SERFF 7.6

Filing Workflow Report (state)

This standardized report, requested by the Operational Efficiencies Working Group, was created to help measure the success of speed-to-market initiatives. This report will allow the state to review workflow data, at the state instance level, for all open filings.

Changes in SERFF 7.6

Public Access/Confidentiality

State users will receive a confirmation message when marking a filing as Public Access and there are any items within the filing that have been requested to remain confidential. The language is as follows:

Confidential items exist on this filing. Are you sure you wish to make changes to the filing's public access?

State Generated Messages

The State Generated Message character limit has been increased to 4000 characters.

State Search

In Filing Search, the 'Interstate Compact' field now defaults to 'No Compact' for those states that belong to the Compact.

Plan Management Messages

The correct Plan Management user will now be displayed in the 'From' column regarding Plan Management items in the Message Center.

Please contact the SERFF Help Desk at serffhelp@naic.org or (816) 783-8990 if you have any questions about the release of SERFF 7.6.
