

SERFF 7.7 Release Notes

SERFF 7.7 was released to production on Thursday, March 24, 2016. The 7.7 release contains changes to the Plan Management Templates, and other small enhancements and fixes.

Changes in SERFF 7.7

Company/Contact Tab

For those users using Firefox or Chrome, the Company/Contact tab will now be viewable in the user interface.

Plan Management Templates

Two updates have been made to the Template tab.

- The Administrative Template will no longer be accepted on the Templates tab.
- The ECP and Network Adequacy templates are now the Network Adequacy/ECP Template.

When uploaded, the Network Adequacy/ECP Template will remain a .zip file.

Plan Management Transfer

State users will have the ability to transfer plans without all QHP template slots filled.

Simple Search (state)

As a result of an enhancement made to State Search in SERFF 7.6, state users were not allowed to search for Compact filings via the Simple Search. That issue has been corrected.

Filing Rules – Submission Requirements

The formatting and organization of the Submission Requirements Search and View pages will be updated for usability.

Compact Filings – Associated Filings

When attempting to associate filings, users may enter the SERFF Tracking Number prefix using lowercase letters without receiving an error.

Users will now receive an error when attempting to add a filing association that would result in a duplicate.

Correspondence – Objection Letters

Users will no longer encounter a submitted Objection Letter without a status.

Please contact the SERFF Help Desk at serffhelp@naic.org or (816) 783-8990 if you have any questions about the release of SERFF 7.7.
