SERFF 7.50.3 Release Notes

SERFF 7.50.3 was released to production on Thursday, April 16th, 2020. The release contains enhancements of State Data Retention to remove state access to destructed filings where the filing originated on an NAIC hosted industry instance.

Enhancements in SERFF 7.50.3

State Data Retention
Filings that have met their destruction date and are filed by NAIC hosted instances will not be deleted.

State access to destructed filings will be removed. These filings will not be returned in search results, state reports/exports, State API (SAPI) or SFA. The state will no longer be able to access these state destructed filings in any way.

Industry users which are use NAIC for data hosting will maintain the filing after the state destructed date. Users will not be able to update filing data once the filing is removed from state access. They will only be able to clone and use the PDF Pipeline functionality. Industry users will be able to search for state destructed filings by a new search criteria of State Access Removed.
