

## SERFF 8.1.3 Release Notes

SERFF 8.1.3 was released to production on Monday, December 5, 2022. The release includes SERFF enhancements and bug fixes, as well as a few technical updates that should have no impact to users.

### Enhancements in SERFF 8.1.3

#### **Create Duplicate Advanced Search Page (State and Industry)**

Built a duplicate advanced search page that allows for searches against the OpenSearch Index. This “Pilot Search” page will be controlled by a role and enabled in small groups of users.

#### **Update All Search Fields to Use OpenSearch Index (State and Industry)**

Modified pilot search page to utilize the OpenSearch Index instead of using database queries.

#### **Removal of Stop Words that Prevent Execution of Searches (State and Industry)**

Removed stop words that prohibit searches from being executed on the pilot search page. The pilot search page will rely on the OpenSearch Index stop words to filter out the results.

#### **Enable Phrase Searches for Document Search (State and Industry)**

Enabled the ability to search by more than one word on the pilot search page in the Document Search field.

### Bug Fixes in SERFF 8.1.3

#### **Included States on an Interstate Compact Filing (State and Industry)**

Included States will show when a Compact filing is reopened.

#### **Acknowledge State Button for Interstate Compact (State)**

When a new state is added to a Compact filing, the ‘Acknowledge State’ button will be displayed.

#### **Disposition Date (State)**

The Disposition Date will display when a new Disposition is saved.

#### **Action Specific Data Showing as Required (Industry)**

When a draft LAH filing is revised, the fields Replaced Form # and Revised Edition will no longer be required.

#### **Internal Filing Notes (State)**

On internal Filing notes, the User Last Modified field will only be updated when a user modifies that piece of correspondence.
